

# CatMoon

Litepaper v0.5.0

# Background

CatMoon is an international community of crypto enthusiasts united by their love for cats, with a goal to shake up the dog dominated meme coin scene with their own community-driven cryptocurrency.

Community is the core element of the CatMoon project by design, which is why the developers chose to fair-launch the token rather than holding a private sale. The fair-launch allowed open distribution of tokens between entirely unrelated individuals, gave every holder a sense of equal partnership, and a great incentive for personal involvement.

# Token

## Contract Address

0xB9A32D637C197bcd29B4D524B942657182DBe1BB

## Total Token Supply

100,000,000,000,000,000 – 100 quadrillion

## Initial Distribution

50% burned

50% seeded as liquidity to the PancakeSwap pair

## Token Links

# Redistribution

8% of every transaction is immediately redistributed to discourage swing trading and to support various aspects of the project.

## Instant Holder Rewards

1% is proportionately distributed between holder wallets in real time to reward holders.

## Automatic Burn

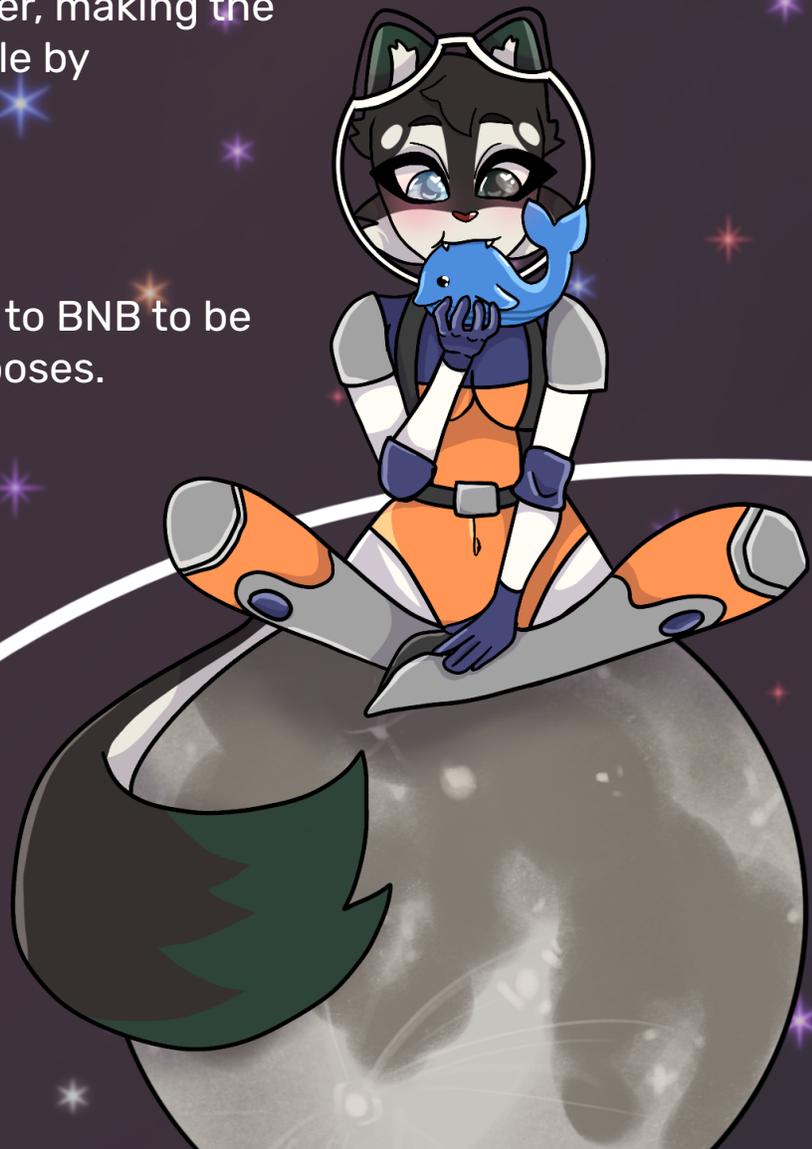

1% is sent to the burn wallet, taking those tokens out of circulation forever, making the remaining tokens more valuable by increasing scarcity.

## Smart Marketing

3% is automatically converted to BNB to be used for social marketing purposes.

## Continued Development

Another 3% in BNB is collected to fund product development.

# Roadmap

The roadmap remains a living document evolving with the project, with new objectives being added as progress is made.

## Phase 1: Ignition

Focus on building a core community of 1000 members . After 1000 members, work on the first NFT collection begins. The NFT collection will be launched in two phases. Phase one of the NFT collection will be launched in June, with the whitelist sale on the 18th and the public sale starting 24 hours later on the 19th.

## Phase 2: Lift Off

After phase one is launched, development on a 2D game will start. (Launch TBD). Once funds are generated from phase one's NFT sales we will begin initial marketing, which will help us create a larger community. Efforts will also start in getting us listings on essential token trackers. After listing on essential token trackers, the second half of the NFT collection will be launched. Phase Two of the NFT collection will fund two new utilities, NFT Staking and an Animal Shelter Fund.

## Phase 3: Orbit

After phase two is done, we will begin a mass marketing campaign, with advertisements that will help us share our project far and wide. We will also be launching CatMoon Merchandise which will be able to be purchased on our website. We will also be applying for listings on Biswap as well as other Dex platforms. Development will be started for a mobile mining game towards the end of this phase.

## Phase 4: The Moon

After phase three we will launch an Animal Shelter Campaign, with posts and videos uploaded to our website where you can see all the good we are doing for animals in need. Further listing options will be evaluated where we will apply for Binance Listings as well as other CEX listings. Once development for the mobile mining game is finished the game will be launched.

# Connect

Get on board at this early stage! Be a part of a highly ambitious crypto project, and a lovely cat community.
