

CatMoon

LITEPAPER v0.3.0

Background

CatMoon is an international community of crypto enthusiasts united by their love for cats, with a goal to shake up the dog-dominated meme coin scene with their own community-driven cryptocurrency.

Community is the core element of the CatMoon project by design, which is why the developers chose to fair launch the token rather than holding a private sale: the fair launch allowed open distribution of tokens between entirely unrelated individuals and gave every holder a sense of equal partnership and a great incentive for personal involvement.

Token

Contract Address

0xB9A32D637C197bcd29B4D524B942657182DBe1BB

Total Token Supply

100,000,000,000,000,000 – 100 quadrillion

Initial Distribution

50% burned

50% seeded as liquidity to the PancakeSwap pair

Redistribution

10% of every transaction is immediately redistributed to discourage swing trading and to support various aspects of the project.

Instant Holder Rewards

2% is proportionately distributed between holder wallets in real time to reward holders.

Automatic Burn

2% is sent to the burn wallet, taking those tokens out of circulation forever, making the remaining tokens more valuable by increasing scarcity.

Smart Marketing

3% is automatically converted to BNB to be used for social marketing purposes.

Continued Development

Another 3% in BNB is collected to fund product development.

Roadmap

The roadmap remains a living document evolving with the project, with new objectives being added as progress is made.

Phase 1: Ignition

Focus on building a core community of 1000 members and listing on essential token trackers.

Phase 2: Lift Off

After 1000 members, work on the metaverse app begins along with the first NFT collection. Towards the end of the phase the social media brand is launched, sharing community-provided cat pics and videos all day every day, making CatMoon a whole new class of its own among meme coins.

Roadmap

Phase 3: Orbit

After 10000 members, the earliest version of the metaverse app is launched, CEX listing options are evaluated, and charity programs begin. CatMoon's donations will go towards animal shelters and wildlife preservation projects.

Phase 4: The Moon

At 20000 members and 100000 holders, the marketing tax is dropped to 0% in favor of more redistribution and burn. An in-house incubator is funded to bring the ideas of the community members to life, and an entirely new roadmap is drawn to take the project to the future.

Connect

Get on board at this early stage and be a part of a highly ambitious crypto project and a lovely cat community. Find out more on CatMoon website and socials.
